

## ***Weapons Manager by Hardcat***

**Visibility and control over your entire weapons inventory**

### **Reduce your risk:**

- Reduce time to perform weapons audit by 80%
- Reduce time to perform issue & return by 90%
- Reduce time to produce usage reporting by 80%
- Configuration & setup in hours
- Compliments and integrates to your ERP system
- Off the shelf product.

### **Know:**

- Where your weapons are
- Who they are issued too
- When they are due to be returned
- What condition they are in

***In organizations where accountability of weapons and related equipment is essential, the weapon management solution lets you to know exactly where all your weapons are, where they have been, and who has been responsible for them at any given time.***

### **INVESTMENT**

*Hardcat Weapon Manager starts from as little as R75,000.00 and as the solution is modular you only pay for those modules your organization requires. Hardcat Weapon Manager can accommodate security companies with a few hundred weapons to a national defence force with thousands of weapons.*

### **INVENTORY**

*Hardcat Weapon Manager allows users to structure and categorize their entire weapon and equipment register within the core module and at the same time collect, track and report on a wealth of information about each piece of equipment. Information held against each item can be accessed and sorted by virtually any field. Each item in the database can have as many as 10,500 associated fields.*

- Asset details (type, serial number, description, GPS coordinates, barcode etc.)
- Asset type/ sub type - unlimited configurable hierarchy
- Product type
- Purchase price, current value
- Warranty/ maintenance/ calibration dates
- Components (parent – child relationship) and attachments
- Locations - unlimited configurable hierarchy
- Person - unlimited configurable hierarchy
- Supplier and maintenance provider
- Complete history log per item in database
- Cost centre and ownership
- 9999 user definable fields per item

## IDENTIFICATION

Weapons can be identified either by directly marking the tool or applying a tag. Hardcat Weapon Manager accommodates all different options available for marking your tools and equipment such as:

- Barcodes
- QR Codes
- Dot Peening
- RFID
- NFC

## ISSUE AND RETURN

Simplify the process of checking out or issuing of weapons and equipment.

- Reduce weapon and equipment loss and misuse
- Track the equipment across multiple locations and jobsites
- Fully searchable and auditable procedure
- Eliminates lines at issue points

## PERSONNEL

Hardcat Weapon Manager provides detailed records for each member as well as external contractors. Staff members can be identified via:

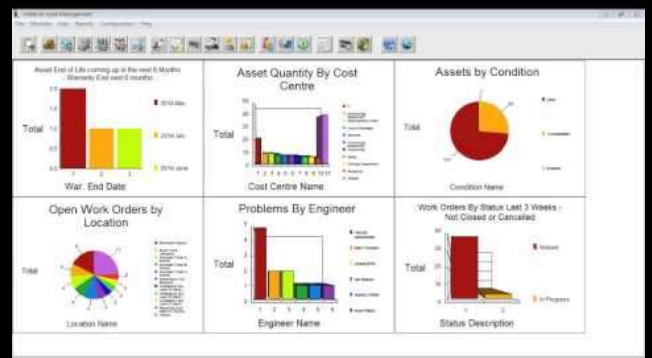

- RFID / barcode staff cards
- Biometrics
- Looked up via staff database

See what weapons and equipment have been issued to which members, how long they have had them for, what condition they are in and when they are due back.

## VISIBILITY, NOTIFICATIONS & REPORTS

Simple and detailed reporting with user defined dashboards and alerts, offers user complete visibility and control of their weapon inventory.

- Over 200 standard reports
- User defined reports
- Available in PDA, email, excel or dashboard
- Scheduled or ad hoc
- Automatic alerts

## MOBILITY

Hardcat Weapon Manager is available on the web, mobile PDA devices, tablets and mobile phones allowing weapon management to happen in the field and on site.

The Hardcat Weapon Manager mobile phone app "MICAT" allows users to view and edit:

- All weapons that have been issued to them
- Condition and location of the weapon
- See maintenance and inspection records or work orders on the weapon
- Create ad hoc works orders
- Allow change of ownership of weapons

## AUDIT AND CONTROL

Hardcat Weapon Manager allows you to know exactly where all your weapons and related equipment are, where they have been and who has been responsible for them at any given time.

Each weapon or piece of equipment as well as person in the Hardcat data base has its own comprehensive audit trail.

Audit trails cannot be altered providing management with full chain of custody of each tool from procurement through to disposal.

## MAINTENANCE / INSPECTION

Set common tasks or templates and automatically schedule work orders for maintenance, inspections and calibrations on all weapons and equipment.

## CONSUMABLES AND STOCK

Track spare parts and ammunition usage, know the quantities and where the items are located as well as tracking how, when, by whom and how much is being consumed.

- User defined reorder alerts
- Audit trail of stock usage
- Automated process of stock taking ensuring accuracy
