

BUSINESS BENEFITS

- Meet compliance obligations and report on proof of compliance when required.
- Effective expenditure and ensuring accountability for a large number of assets, of varying types, which are spread across a wide geography.
- ISO 55000 Compliant which means an additional layer of reliance and confidence.
- Control over the chain of custody of all your high-value and critical assets, both fixed and mobile.
- Efficient audit activities, ensures the asset data is accurate and empowers the organisation to achieve effective governance and declare statutory compliance with confidence.
- Clear accountability of assets, delivers instant access to accurate asset information, delivering asset certainty.

KEY FEATURES

- Alerts for preventative maintenance saves you from unnecessary downtime.
- Efficient asset allocation.
- Balancing competing service and asset needs and priorities.
- Best available Mobile App technology for teams in the field.
- Match assets to service delivery needs.
- Seamless integration with existing systems helps create a unified asset management ecosystem, facilitating more informed decision-making and better resource allocation.
- Quick adoption by employees, leading to higher data accuracy, faster asset processing times, and reduced chances of errors in asset management activities.

WHO WE ARE AND WHAT WE DO

Founded in 1986, Hardcat Pty Ltd is a proudly Australian-owned company based in Melbourne. As pioneers in the field, our mission has always been to lead the way in innovative asset and evidence tracking solutions.

Hardcat asset management software is a specialist software suite that provides a single source of truth to support organisations in improving the utilisation, maintenance, and management of their asset base.

Hardcat solutions enable efficient and automated processes whilst also providing wide-ranging and instant visibility of asset information over its entire life cycle.

One of the stand-out advantages of adopting Hardcat solutions is the significant time savings and efficiency gains that far outweigh initial investment. Benefits include:

- Fraction of the cost of equivalent large enterprise systems.
- Robust, established technology, proven in diverse markets and industry sectors.
- One powerful database that can be segregated for different uses or projects.
- GIS mapping integration allows users to see asset locations as well as maintenance.
- Access security allows restricted views e.g. user cannot see certain information.
- A market proven Commercial Off The Shelf (COTS) product providing speed of implementation and the benefits of further enhancements and features becoming available with the products road map.
- A modular software solution with a rich feature set for managing the full life cycle of assets and evidence (chain of custody).
- A cloud-based enterprise-class platform designed using N-tier web architecture to withstand high loads, high traffic, and high data volumes; up to 50,000 concurrent users.
- Complementary to the customers' existing IT ecosystem with a high level of integration capabilities, utilising the integration API's built into the product DNA.

USE CASES

"It soon paid for itself by way of revenue being saved by the comprehensive tracking of all Council inventory by Hardcat. The potential for savings from undetected losses should be quite substantial. The main benefit of using Hardcat to record and track IT inventory has been in enforcing accountability, accurately recording and valuing what the Council actually has, and assisting in monitoring the accuracy of asset data maintained by the Council's facilities management contractor."

"DIRC now has a global view of its asset portfolio and can at any time account for its assets anywhere in the world."

HARDCAT LEBOSI® SOLUTION ECO-SYSTEM

TRUSTED SINGLE SOURCE OF TRUTH DELIVERS ASSET CERTAINTY

Hardcat Lebosi is a comprehensive and reliable Enterprise Asset Management (EAM) solution that delivers to organisations specific asset management needs, while complementing and working in harmony with existing ERP and IT applications.

Integrate with other software

Integrates with other software systems, including accounting software, ERP systems, and Computerised Maintenance Management Systems (CMMS).

Part of an IoT solution

Can be part of an IoT solution where associated sensor data can be sent to the Hardcat Lebosi software via the integration framework to trigger actions for creating work orders related to those events.

Enterprise IT ecosystem

Integration framework enables our software to become part of your IT ecosystem. Automate user management for the EAM via integration with your HR system as well as the authentication solution (SSO) to enhance the overall user experience.

Comprehensive reports out-of-the-box

Inbuilt suite of fixed reports and full capability to introduce customised reports to address any unique business needs. These reports can also be scheduled to run automatically.

Customisable

Customisable to meet the unique needs of different organisations. The software can be configured to support different asset types, work-flows, and reporting requirements.

Mobility

Users in the field can access the Hardcat Lebosi Mobile Application either in a connected or disconnected state, allowing for off-line capabilities where wireless (mobile or Wi-Fi) connection is not available.

We invite you to register for a free demonstration or for more information on how **Hardcat** can empower your organisation email us at sales@hardcat.com | (+61) 3 9695 5400 | hardcat.com
